UP LAUNCHES ENGLISH DEGREE

APPLY NOW

Hot on the heels of UP successes:

- Top 500 university in the World – the only Cambodian university in THE
- 100% success rates in Exit exams – the highest in Cambodia
- 103 international research publications
- >60,000 hrs on online delivery using UPs own online learning system
- 13 full-time native-level English teachers

UP is delighted to announce the launch of a **BRAND NEW**, dedicated four-year Bachelor of Arts (BA) in English Language, Entrepreneurship and Employability. The only one of its kind in Cambodia

This degree programme will prepare graduates to gain a high degree of fluency and exceptionally strong communication skills to provide graduates with modern English (the international language of success), entrepreneurial skills, and the employability skills needed to succeed in the 21st Century!

English is the international language of success across the world not only in health, I.T. and business but also in most other fields. Over the past 3 years UP has increased English study – now 4 years, far more than other universities and **IT'S FREE OF CHARGE**. Students start extensive English classes in Foundation Year and continue until the end of Year 4. This has been possible through the employment of many dedicated native and native-level English teachers, and a commitment by UP to ensure that every student will have a good command of English on graduation. UP knows that good English leads to better jobs and higher salaries.

"I am glad that UP adopts the English-Medical program into the teaching system. Although we are more comfortable using and speaking Khmer, our native language, this system feels like an elevation to a new chapter. A start to something new. Not only are we able to enhance our knowledge in the medical field, it also allows us to feel more comfortable hearing English medical terminology. This system helps us improve our English skills and opens up more opportunities for us to study or work oversea. The other benefit is that we don't have to study part-time English class on top of our hectic study schedule on campus since it is already included in the program."

Nut Sopheab, Year 2
Faculty of Dentistry

"One of the biggest advantages that UP has offered is its English Medical Program. It has proven to be very useful, especially in the medical field. As a medical student myself, studying Medicine in English has helped me to conduct better research, be able to access larger quantities of information, and be aware of up to date trends in the healthcare sector. At the same time, this allowed us to improve both our English and English medical terminology which could provide many opportunities to further continue our studies abroad. Furthermore, UP also provides English courses up to our 3rd academic year, which I find very helpful in aiding our learning experience."

Chea Monisota, Year 3
Faculty of Medicine

WHAT'S UP ON CAMPUS

• 19 MAY 2022 | ROYAL PLOUGHING CEREMONY

30% SCHOLARSHIP AVAILABLE FOR BACHELOR OF NURSING-MIDWIFERY (3+1 PROGRAM)!

UP's Bachelor of Nursing-Midwifery (3+1 Program) is a special program for Associate Degree of Nursing students to upgrade their skillsets with further study to gain the degree in Bachelor of Nursing-Midwifery.

- Deadline of Registration: 18 June 2022
- Class starts: 15 July 2022
- Class Schedule: Friday, Saturday, Sunday
- 1 Year Program with flexible schedule
- The program offered to Associate Degree in Nursing graduates only
- Hand-on Experience with our regional hospital partners

Please come to the University of Puthisastra for registration. Hurry UP! Limited number of registrations!

For more information about the admission, send us message or join the university's official Telegram Group via the link <https://t.me/UPAdmissions>

INTERNATIONAL NURSES' DAY

International Nurses' Day is a global event observed on 12th May every year. It is mainly observed to honor nurses in healthcare, for their diligence and service to society. 12th May is also the anniversary of Florence Nightingale's birth, the founder of modern Nursing.

It is also a day to recognize the contribution and importance of nurses and the nursing profession around the world. The International Nurses' Day celebration reminds us of the importance of nurses and the huge contribution to health services and health outcomes they make, across societies globally.

Nursing care is holistic care, encompassing the physical, mental, and spiritual health and wellbeing of individuals, families and communities in society. "Save one life you are a hero, save one hundred lives and you are a Nurse": Proud to be a Nurse.

UP VISIT BY PIERRE FAUCHARD ACADEMY INTERNATIONAL PRESIDENT

The Pierre Fauchard Academy (PFA) is one of the world's oldest dental honor organizations and was founded in 1936 by Dr. Elmer S. Best, a Minnesota dentist. Troubled by the proprietary nature of many dental publications, he wanted to help the profession gain control of its literature and assure its independence from commercial interests.

His passionate concern for the search for knowledge and the raising of professional standards laid the groundwork for the beginning of the Academy. This attracted outstanding dental researchers and teachers to its ranks and led to a continuing role in fostering dental science.

The Academy is named after Pierre Fauchard of France (1678-1761), who is recognized as the "Father of Modern Dentistry"; for raising dentistry to a profession. He wrote a book named "Le Chirurgien Dentiste, ou Traité des Dents" - the first true textbook of dentistry.

The mission of the Pierre Fauchard Academy is to recognize and develop outstanding leadership in our profession internationally. They accomplish this by consistently focusing on professionalism, integrity, and ethics worldwide, by their conduct as worthy role models, by the advancement of dentistry to the highest level, by supporting and honoring colleagues for their outstanding work, research, contributions, and public service, and by providing excellence in programs, education, and leadership in oral health care.

During the recent visit to Cambodia by the PFA International President (Dr Armyl Banez) and the Asia Trustee (Dr Myrna Banez), Assoc Professor Anand Marya (Head of Orthodontics at UP) was officially inducted as the Section Chairman for the Cambodia Section.

The Dean of the Faculty of Dentistry, Professor Callum Durward, has been a Fellow of the Academy for about 15 years and was pleased to welcome our distinguished visitors to UP. After a campus tour, our guests had a question-and-answer session with students and staff from the Faculty of Dentistry. It is hoped that the PFA Cambodian Section can grow in the coming years, and the possible formation of a student chapter was discussed. In Cambodia, PFA hopes to focus on leadership development, dental education, student research, and community service.

PRE-HOSPITAL TRAINING FOR YEAR 7 MEDICAL STUDENTS

Continuing its pre-hospital training courses, the Faculty of Medicine has organized one Course for MD year 7 students about to start their internship. UP is the only university to offer pre-hospital to its students. The one-day training was divided into 3 stations:

Station 1: "Seriously Ill Patients":

Students learnt to assess the signs of patients in serious conditions. The algorithm ABCDE, which stands for Airway, Breathing, Circulation, Disability and Exposure, was applied in the practical training. With each of the conditions, students learnt to take the initial step in their management, such as choosing the appropriate face mask and applying high-flow oxygen, performing intubation and giving boluses in case of shock. The students were also encouraged to apply critical thinking in making a diagnosis in emergency cases.

Station 2: "Advanced Cardiac Life Support":

Students learned how to evaluate the cardiac rhythm and to distinguish shockable and non-shockable rhythms. They also learnt to choose the right emergency medications for cardiac life support.

Station 3: "Reading Arterial Blood Gas Analysis":

The students learnt the basic rules in interpreting arterial blood gas analysis results. They also learnt to differentiate between the partial and full compensation of arterial blood gases. Case studies were presented and interpreted.

THE FIRST DAY OF CLASS AT UP

The closure of universities due to COVID-19 concerns have turned a spotlight on those problems and how they contribute to educational inequality in the nation. Thankfully all economic, social and cultural activities are returning to normal. As a result, UP has very busy preparing the teaching and learning including schedule, timetables, curricula, assessment, teaching materials and staff development for this new beginning. The 2nd May was first day of semester 2 at UP. It is the result of several months of hard work of UP, and related supporting departments.

It is an exciting day for everyone. Students and lecturers come to real classrooms. They can also practice in laboratories as it was put into the limit during the Covid pandemic. Students from year 3 to year 5 starts to do their clerkship and internship at hospitals, pharmaceutical companies, clinics and other institutions. Other extra-curricular activities such as clubs, study tour, training, workshop, volunteer work) started to run normally. We have seen each other physically on campus. The first day at on campus is fantastic.

ORIENTATION FOR THE SECOND SEMESTER ACADEMIC YEAR 2021-2022

Welcome to Semester 2 Academic Year 2021-2022!

UP conducted the orientation for lecturers and students for all departments and faculties for the second semester of the academic year 2021 – 2022.

The orientation was mainly focused on the UP's policies, the curriculum of each program, course outline, schedules, assessment plans with policies of each course, UPERP-Lecturer and Student Attendance system, UPOP Moodle, and teaching methodology included the student's clerkship and internships. It should also be noted that the Lecturer Orientation was on 30th April 2022 to 2nd May via an online platform (Google Meet) The orientation was assisted by the participation of the faculty staff Registrar officer, IT officer, HR officer, lecturers, and students.

UP would like to thank you for everyone's participation, in taking part in these orientations; it helps and improves a lot regarding lecturers' policy, teaching

PHARMACY STUDY TOUR AND RESEARCH

The Faculty of Pharmacy of the University of Puthisastra, under the direction of Dr. Chea Sin, Dean of the Faculty of Pharmacy and a member of the Steering Committee of the Volunteer Youth Movement of the Union of Youth Federations of Cambodia for the Private Higher Education Institutions, led 265 pharmacy students to conduct study tour and research in Siem Reap under the theme: "Collecting voucher specimen, surveys related to the use of medicinal plants and health education" with the participation from plant biology Professor and traditional healers.

During the study tour, there was also the support and attention of the leaders of the University of Puthisastra, the Union of Youth Federations of Cambodia at the University of Puthisastra and the authorities at all levels of Siem Reap to make the whole process smooth. The purpose of this study tour were to:

- Conduct ethnobotanical research: pharmacy students participated in research activities under the guidance of the pharmacy faculty, which includes Medicinal Plants, Ethanobotanical survey and Community Health Education. Students had been involved in writing research proposals, collecting data, entering data, analyzing data and writing Manuscripts.
- Implement the method of plant collecting and establishing voucher specimen stored at the University of Puthisastra: The plant samples would be studied and stored as a reference with proper packaging under the guidance of the professor and traditional healers.
- Build a solidarity with the staff and students: Teamwork and communication are very important for the safety of medicine use and the quality of care, medical students must know how to work as a team and work with professionals as well as patients. In this project, students had worked to exchange and teamwork with other teams to develop their soft skills.
- Strengthen the quality of health education and charity: The understanding of health education is very important because we can use the knowledge we have learned for our people as well as their families. During the Covid pandemic, people are struggling, so this is a good sharing of the health care of the people there.

A big thank you to the University of Puthisastra, as well as the Union of Youth Federations of Cambodia at Puthisastra for supporting and sponsored companies that have supported this project.

UYFC ACTIVITIES AT UP

In order to contribute to the Royal Government in the fight against COVID-19, students of the Faculty of Pharmacy of the University of Puthisastra and other Departments have also volunteered to join with the Royal Government as well as the Ministry of Health through the #Doctor Alliance of Union of Youth Federations Cambodia (DA-UYFC) to provide vaccinations such as the basic dose or boost doses (both dose 3 and dose 4) to the people according to the guidelines of the Royal Government in some provinces.

These include Kampong Cham, Kampot, Prey Veng, Kampong Chhnang, Tbong Khmum, Kampong Thom, Pursat, Svay Rieng, Stung Treng, Kratie and Preah Vihear from April 28 to May 15, 2022.

Finally, on behalf of UP Students as well as in other fields, we would like to express our deep gratitude to the Royal Government for providing free vaccines to all the people, and also thank to citizens who came to receive the vaccine voluntarily to join the Royal Government in the fight against this deadly disease COVID-19 and also wish all Cambodians good health and avoid this disease all together.

Once again, we would like to thank all the Armed Forces officers at all levels who have been actively involved in sacrificing their physical and mental strength to prevent the spread of COVID-19 throughout Cambodia.

Join together for Cambodia to overcome COVID-19

UP NOW OFFERING HIGH QUALITY IMPLANTS FROM GERMANY

Recently UP has a new brand of high quality implant from Germany called Alpha Dent. The first patient to receive 4 of the implants at one visit was seen in the UP Dental Hospital last week, treated by Dr Meng Bunleng and Dr Tak Ranuch (Head of Implantology).

Dr Ranuch is one of several experienced implant dentists who work in our dental hospital, and we believe our implant service can beat other top clinics for quality and price.

If you or your family member or friend have missing teeth, please see our implant team at UP for a free consultation. Call now on 012 414 563 and book an appointment.

NOTE: THE CLINIC IS NOW OPEN FROM 8.30AM UNTIL 7.30PM FROM MONDAY TO FRIDAY.

UNIDENT, DENTSPLY SIRONA AND UP LAUNCH NEW IMPLANT COURSE

Last week, the first session of the new Unident–Dentsply Sirona-UP Dental Implant course was held at UP for 18 Cambodian dentists. This is the 10th Batch of dentists undertaking the course using Ankylos implants from Germany, which in recent years has been held at UP.

The course is being led by one of Cambodia's top implant specialists - Dr Chav Bunhean DDS, MSc (Implantology), assisted by Dr Peung Kimsreang DDS MSc (endodontics), both from Roomchang Dental Hospital.

The first module included 1 day of introductory lectures, and was followed by a welcome dinner attended by the President of UP, Professor Ian Findlay.

UP is very pleased to collaborate with Unident and Dentsply Sirona on this new course, as part of UP's mission to help up-skill the dental workforce in Cambodia.

STUDENTS SHINE AT SPEECH CONTEST ON TOBACCO TAX

University of Puthisastra (UP) recently hosted a Youth Public Speaking Contest on the topic “Should the tobacco tax be increased?”. The four invited judges, Dr Chea Sin (Dean of Pharmacy, UP), Dr Mom Kong (Director, Cambodian Movement for Health), Dr. Ray Rany (Director of Tobacco and Health, Ministry of Health) and Miss Choung Chanboramey (President of UP student senate) had previously shortlisted 10 finalists from among the 71 entries from students who came from many different schools and universities around Phnom Penh and provinces.

- The successful students in the semi-final were:
- Heng Sophearum (Royal University of Phnom Penh)
 - Sim Sreyleap (Net Yang High School, Battambang)
 - Ly Rattana (University of Health Sciences)
 - Pailin Leakhena (University of Indrawichea, Siem Reap)
 - Roth Channet (University of Puthisastra)

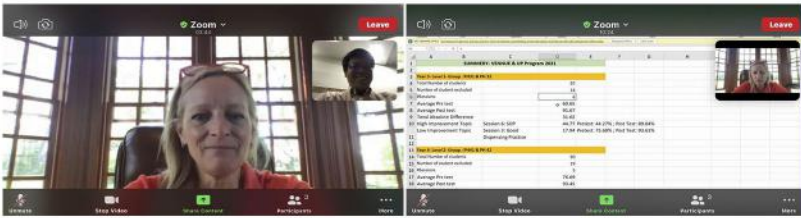

The event was held in Hall B and a large media contingent were present, along with many students and staff from UP. Each of the 10 students spoke on the topic for up to 5 minutes, highlighting the myths and facts about tobacco tax, exploring the issues, and putting forward convincing arguments to the judges. The top 5 will now go on to compete in the finals in front of a large audience and invited dignitaries from the Ministry of Health and other institutions. The Final will be held on 23 May from 8:00 am to 12:00 pm at Cambodia-Korea Corporation Center. All UP students and staff are invited to attend this event which will be broadcast live through UP and CMH Facebook pages. The prizes for the top 3 winners are 2 million riels, 1.5 million riels and 1.2 million riels, plus a medal and the appreciation certificate issued by UP.

ICT STUDENT ORIENTATION AND U-PAY CAREER PATH SHARING SESSION

The ICT Department arranged a physical student orientation before the new semester II starts. The orientation itself covered semester-I course evaluation, internal policy reminders, weekly schedule, and the lecturer biography. In addition to the schooling information, a sharing session on internship and kickstart career paths was delivered by an outstanding student and U-Pay, one of the potential local payment service institutions in Cambodia. The guest speakers highlighted their experiences, inspiring company journeys in the fintech industry, its daily operations, management infrastructure, and competency skills they need from candidates.

The students were active in asking questions and reflecting on which skills they should acquire before landing a suitable job. Much appreciation to our speakers as well as U-Pay for the priceless speech to our students.

DR CHEA SIN MEETS WITH MS. TAMMY ALLEN, FOUNDER AND CEO OF VENNUE FOUNDATION

On Thursday evening, 5th May, 2022, Dr Chea Sin, Dean of Faculty of Pharmacy, met with Ms. Tammy Allen, Founder and CEO OF Vennue Foundation, and Mr. Phalla Sovanrith, Vennue Foundation Program Manager for Cambodia to discuss and celebrate UP's and Vennue Foundation successful since 2021; and to find ways to move forward together in 2022 and beyond for the benefits of Cambodian pharmacists and pharmacy students. In 2021, we had trained 283 UP pharmacy students on the best practices. The results showed great impacts on their learning through remarkable improvements between the pre and posttests.

And in late March and early April 2022, we also trained 124 Cambodian pharmacy professionals from across Cambodia. Vennue Foundation are a team of global health professionals who share a vision of improving lives in the developing world through health system strengthening and innovation. They are pharmacists, physicians, and public health advocates committed to illuminating the valuable role of pharmacy workers and equipping them to meet today's complex medical challenges.

We hope that together we will make more positive impacts on pharmacy professionals in Cambodia, and eternally better outcomes for the patients.

UP THESIS LEADS TO CHANGES IN CLINICAL COMPETENCY ASSESSMENTS IN FACULTY OF DENTISTRY

ថ្ងៃពុធ, ០៧ ខែ មេសា ឆ្នាំ ២០២២ ០៩:៣០ ព្រឹក

To ensure that students are competent on graduation to perform basic dental procedures, several years ago the Faculty of Dentistry introduced a range of competency assessments for a range of procedures. This is standard practice in dental schools around the world, however this is not the case in all Cambodian dental schools. Each student has a form (with the steps of the procedure listed down) to be signed off by a nominated tutor – who has assessed whether they are competent to perform a particular skill safely and without error. Competency tests are presently used in addition to the normal clinical log sheet which record the number of procedures completed.

Only when a student has already practiced the procedure several times on patients, they can request a competency test be done. The tutor observes the procedure from beginning to end and assesses whether they are competent or not. If they do NOT pass, they can do it again at a later date on a different patient.

Recently a thesis was defended which looked at the introduction of the UP Clinical Competency Assessments in the Faculty of Dentistry. The three students were Ouch Dara, Ly Sovanna and Chhon Thavy. The thesis was supervised by Dr Soy Rasy and co-supervisor Prof Callum Durward. In the study, which was conducted prior to Covid-19, senior dental students as well as their clinical tutors answered a questionnaire about the clinical competency assessments that all students must complete before graduation. Although their views on competencies were overall very positive - many felt that:

- some competencies were too difficult or too time consuming
- there were too many competency assessments
- it was sometimes difficult to find tutors who had enough time to assess students doing all their competencies in the clinic.

The thesis passed with credit. Following the thesis defense the faculty decided to reduce the number of competencies to 21 - eliminating some of the more difficult and time-consuming ones. Students are very happy with these changes, and we are still able to ensure that our graduates are competent to practice dentistry safely when they graduate from UP.

UP PHARMACY RECEIVED 366 APPLICANTS

Faculty of Pharmacy is strongly committed to producing highest quality graduates with knowledge, skills and good attitudes to serve the Cambodian community. As a result, UP pharmacy is one leading faculty who received the most applicant each year. By 09 May 2022, we have received 366 applicants who want to study pharmacy at UP. This wonderful result happens by reasons.

Reason #01 University and faculty management have clear visions, missions and strong commitment to develop outcome-based education in Faculty of Pharmacy to be locally and internationally recognized (World school list of school of pharmacy, Asian Association of School of pharmacy, ASEAN Association of School of Medical Technology, and ASEAN PharmNET)

Reason #02 Faculty of Pharmacy has enough qualified human resources: full-time and part-time lecturers, and academic staffs to manage, support and orient students to succeed in their academic and professional career.

Reason #03 All laboratories and simulated pharmacies are fully equipped with modern equipment and instrument for our students to study, practice and conduct research. From the new academic year, Faculty of Pharmacy will invest in modern laboratory equipment and instruments to upgrade practical and research capacity of its laboratories.

Reason #04 Faculty of Pharmacy provides additional courses (Foreign languages, IT, Critical Thinking and research skills) and extra-curricular activities in addition to the national curriculum so that the graduates are competent to meet the local and international needs in the 21st century.

Reason #05 Faculty of Pharmacy has good collaborations with clerkship places including hospitals, laboratories, companies, pharmaceutical enterprises, industries and other universities to provide students with chances to do clerkship and volunteer work effectively and efficiently.

Reason #06 UP pharmaceutical students have opportunities to do international internship outside Cambodia. During the last 4 years, 178 students have been sent to do international internship and conferences in Japan, Thailand, Malaysia, Singapore and Indonesia.

Reason #07 UP pharmaceutical students have opportunities to do research and publish their research articles in national and international journals.

Reason #08 Faculty of Pharmacy has been closely collaborating with local and international universities and industries to conduct joint research, and provide scholarship and employment for students after graduation. Students will be able to continue their study all over the world.

Reason #09 UP Faculty of Pharmacy is the only one school of pharmacy in Cambodia who has the highest passing rate in National Exit Exam.

Reason #10

UP Faculty of Pharmacy has a good supporting system for students such as customer service, career counseling, clubs etc.

MIDWIFERY JOIN CURRICULUM UPDATE WORKSHOP AT KAMPONG CHAM PROVINCE

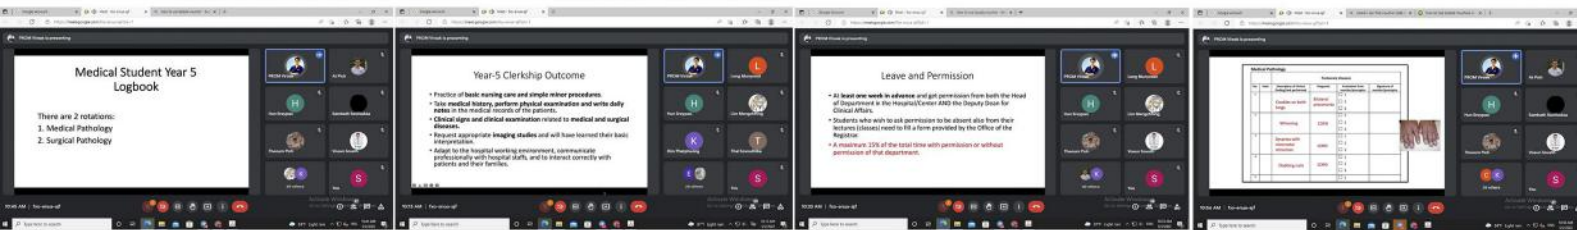

UP's Midwifery dept joined the "Consultation workshop on finalize on national curriculum on associate degree in midwifery update" - a technical work group on national curriculum update - at Kampong Cham's regional technical training center, at Kampong Cham province.

The workshop was managed by MOH's Human Resource Development and sponsored by UNFPA. UP staff spent two days, from 9th to 10th of May, with the presence of His Excellency professor Yit Sunnara to opening the program, discussing, and provide the recommendation on the latest update curriculum of Associate degree in midwifery.

ONLINE ORIENTATION FOR YEAR 5 MEDICAL STUDENTS ON CLERKSHIP POLICY AND LOGBOOK

Dr. Prom Vireak, Deputy Dean for Clinical Affairs of the Faculty of Medicine, provided the orientation. It is essential for medical students to understand their duties and responsibilities in the hospitals, their rights during the clerkship training and the assessment and evaluation at the end of their training. There will be two rotations during MD Year 5: Medical Pathology and Surgical Pathology.

UP ICT DEPARTMENT TO JOIN THE 7TH CAREER FORUM AT PN

UP ICT Department is going to join the annual Career Forum that will be on Sunday 22 May 2022 to help graduates from Associate Degree programs seek employment and further their academic pursuit.

The annual Career Forum organized by Passerelles numériques (PN), a non-profit organization under French law, created in 2005, operating in three Asian countries: Cambodia, the Philippines and Vietnam. Their mission is to provide education, technical and professional training in the digital sector to young underprivileged people by leveraging their potential and willpower.

See you at PN on Sunday 22 May 2022.

UP MIDWIFERY DEPARTMENT ORGANIZES CPD ON PRE-PREGNANCY CARE

Every mother wants to have a healthy baby and healthy body after giving birth. This workshop will guide you on how to prepare yourself as a mother before you get into pregnancy. This preparation will help women to prevent complications and inform women about the important steps that need to be accomplished so they can protect their baby from unwanted complications and get a healthy pregnancy.

This content is opened for everyone, health care providers and women and their families, who are interested to meet and receive new knowledge from the expert. Special bonus points for the health care provider, especially midwifery, will receive the CPD score recognized by Midwifery Council in Cambodia.

Registration link:
<https://forms.gle/TufwWYXrQBTaA5j2A>

The poster is for a CPD workshop titled "ការអភិវឌ្ឍវិជ្ជាជីវៈ បន្តសម្រាប់ម្តាយ" (Professional Development: Continuing for Mothers). It features the logos of the University of Puthisastra and the Cambodian Midwives Council. The text in Khmer describes the workshop's focus on pre-pregnancy care, listing the speaker as the Vice-Chief of Maternal and Child Health Unit at Kandal Provincial Health Department. It includes a QR code for registration and a list of details: date (May 19, 2022), time (8:00 AM - 12:00 PM), and a 2000 bonus CPD score. The speaker's name, Yim Suthy, is also mentioned.

SCIENCE RESEARCH STUDENTS' TP CLASS-PRACTICING USING MICROSCOPE

Since the second semester of the academic year 2021 – 2022 was started on 2nd May, 2022, students of the Bachelor of Science Research Program of the Faculty of Health Sciences and Biotechnology, as well as other faculties of the University of Puthisastra, are actively operating in both theory and practice classes.

The microscope is a device that provides an enlarged image of small objects that are invisible to the naked eye. There are two well-known types of the microscope; (1) optical microscope and (2) electron microscope.

This tool plays an important role in assisting scientists in researching specific microorganisms such as viruses, bacteria, parasites, and cells (plant, animal, and human), as well as other small objects.

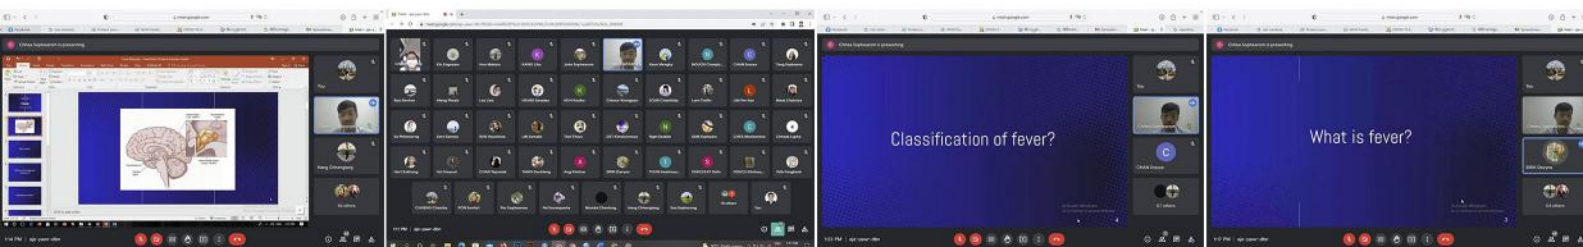

WEEKLY CLINICAL PHARMACY CLUB

Clinical Pharmacy club opened for pharmacy students is held every Thursday started from 1:00 to 2:00pm. Its purpose is to provide pharmacy students a chance to learn clinical knowledge and skills from different cases happened in hospitals, pharmacies and laboratories, and this club will be an active discussion platform on clinical aspects within pharmacy responsibilities.

The Clinical Pharmacy club provided many good topics in order to share knowledge with students. This week one of topics mentioned in the clinical club is Fever. That is an interesting topic and this happens to most of the people.

Students could understand the meaning of fever, its classification, pathogenic that cause fever, symptoms, and treatment. Moreover, students had chance to solve clinical case and practice with exercise and question.

This will help to expand students 'horizon particularly in clinical perspective.

UP TO LAUNCH NEW CLUBS AND SOCIETIES FOR STUDENTS AND STAFF!

UP is looking to launch several clubs and societies for both staff and students such as Cycling, Running, Gym, Movie, and the Green Planet society.

Why join a UP Club/society?

1. You'll learn more about yourself.
2. You'll develop soft skills.
3. You'll learn how to work with a team.
4. You'll get networking opportunities.
5. You'll be able to use the skills you've learned in class.
6. You'll learn how to engage with diverse groups of people.
7. You'll gain leadership skills.
8. You'll get a break from your studies.
9. You'll expand your resume.
10. You'll be able to give back to the community.
11. You'll have fun!

Students who select one or more clubs/societies will be emailed at a later date to set up the first meeting where dates, times and locations will be discussed.

To sign up, please go to the following link:

<https://docs.google.com/forms/d/e/1FAIpQLSfRwpXfKB3HGICYRWy1iMCDjzYQ-VVXqZAt9c2lh08RVp4nlg/viewform?fbclid=IwAR2Yk-wz1EXBxPGiczV9MD0EqCCwePd3HBsTEV1A-EXLA2qzqu3jvVVRg2lw>

**LOOKING FOR
CANTEEN
OPERATOR
AT UP!**

Responsibility:

- Provide food service for UP students, lecturers, staffs, and visitors
- Provide healthy, nutritious, and affordable food for UP staff and students.

Requirement:

- Provide at least 5-10 staff depending on your management
- At least 1 year experience in providing food service at any education center, university or any other place
- Friendly attitude with all UP members
- Ability to work with admin team to ensure the good food service for all UP members
- Be open mind to get constructive feedback for improved service from time to time

Apply:

If you are interested, you may come and visit our admin office at UP in order to fill out the forms or call Mr. Ouk Sovann, our security team leader, Tel: 096 532 4965 for further details.

UP SPECIAL OFFER - \$7 ONLY FOR THE TICKET PRICE AT GARDEN CITY WATER PARK

Garden City Water Park, Cambodia's first and largest water park, is offering a very special deal to University of Puthisastra students and staff. The University of Puthisastra and Garden City Water Park signed a contract on May 2, 2022. The agreement's major goal is to promote recreational activities that UP students and employees can participate in after a long day at school or at work.

Garden City Water Park has over 40 attractions and slides, all of which are guarded by certified lifeguards who put your safety first. For the students and staff of the University of Puthisastra, the ticket price is really special. It is only \$7 per person. This includes an entrance ticket and one wristband.

What a special deal! Make plans with your buddies to spend the weekend together.
