

## JOB DESCRIPTION

<b>Position Title</b>	:	<b>Mobile App Developer</b>
<b>Department</b>	:	<b>IT Operation Office</b>
<b>Report to</b>	:	<b>IT Manager</b>
<b>Reportee (if any)</b>	:	
<b>Location</b>	:	<b>Phnom Penh</b>

### I. Position Summary:

University of Puthisastra is looking for a skilled **Mobile App Developer (Native)** with at least **3 years of experience** to design, develop, and maintain high-quality mobile applications. The ideal candidate should have strong experience in **native mobile development (Android and/or iOS)** and be able to collaborate closely with backend and frontend teams to deliver scalable mobile solutions.

### II. Duties and Responsibilities: *(Verbs are listed below for reference only)*

The overall job description below outlines the main areas of responsibilities of the Employee:

- Design and develop **native mobile applications** for **Android (Kotlin/Java)** and/or **iOS (Swift/Objective-C)**.
- Collaborate with **backend and frontend developers** to integrate APIs and services.
- Work closely with **UI/UX designers** to implement intuitive and user-friendly interfaces.
- Integrate mobile apps with **RESTful APIs and third-party services**.
- Maintain and improve **application performance, scalability, and reliability**.
- Perform **testing, debugging, and troubleshooting**.
- Participate in **code reviews** and maintain coding standards.
- Prepare and manage **app deployment to Google Play Store and Apple App Store**.
- Keep up to date with **mobile development trends and technologies**.

### III. Minimum Qualifications and Requirements:

#### 1. Experience:

- Proficient knowledge of relevant programming/computer languages for Android, iOS, and Windows devices.
- A portfolio of applications you have created or contributed to.
- Ability to multitask.
- Excellent interpersonal skills

## 2. Education:

- Bachelor's degree in computer science, software engineering, management information science, or a related field

## 3. Skills/Competencies:

- **Minimum 3 years of experience** in mobile application development.
- Strong experience with **Android (Kotlin/Java)** and/or **iOS (Swift/Objective-C)**.
- Experience integrating **RESTful APIs** and working with **JSON**.
- Experience using **Git or other version control systems**.
- Good understanding of **mobile application architecture** (MVC, MVVM, etc.).
- Experience with **Firebase, push notifications, analytics, and crash reporting**.
- Experience with **CI/CD pipelines for mobile applications**.
- Familiarity with **ReactJS** or modern frontend frameworks.

## 4. Personal Quality

- Ability to work as a team
- Be diligent and honesty
